Joseph Hopkins – Full Stack Engineer

Aurora, Colorado | **(303) 261-5377** | joseph.hopkins@gmail.com | github.com/JoeyHopkins | linkedin.com/in/joey-hopkins/

Full Stack Engineer with previous work experience that has developed a proven foundation for problem-solving, leadership, adaptation, and teamwork. I have obtained respect from my peers due to my exceptional problem solving skills. In the teams I have worked on, I have naturally been promoted to a leadership position due to my ability to help fellow developers dissect their issues in an environment that provides positive growth to all parties.

Experience

January 2022 - PRESENT

MacGuyverTech, Glenolden, PA – *Lead Full Stack Engineer / Project Manager*

- Integral piece to application development due to depth of knowledge and understanding of client systems
- 100% remote, trusted to work independently primarily using Node/Vue and SQL DBs to build business applications
- Streamlined long term vision for project in project management role by establishing weekly sprints with client
- Optimized test in production by leading architecture of production and software upgrades
- Trusted to take decisive and accurate actions when conflicts arise
- Forecasted and avoided blockers by organizing the team of developers and managing the project without incentive
- Managed application upkeep and pushes to testing environments and production servers
- Took Initiative in managing databases and writing scripts to refresh clients test data daily
- Relied upon to revise and educate junior developers preventing sub par code from making it to production servers
- Delegated practical tests for new developers in conjunction with the HR team
- Led the onboarding and orientation for new developers
- Worked with a team to scrape data from an API and use it to populate a clients database
- Responsible for working with 3rd party vendors to ensure application expectations are met
- Strong understanding of team capabilities, leading to accurate and efficient work assignments

June 2022 - August 2022

Staghead Blockchain Services, Colorado – *Full Stack Engineer / Blockchain Engineer*

- 100 % remote
- Built UI and worked with Solidity to build block chain apps that talk to the Ethereum blockchain

Education

June 2015 - December 2020

Dakota State University, South Dakota – *Bachelors of Computer Science*

- Cumulative GPA: 3.042
- Major GPA: 3.368
